

## Best Presentation award

18:30	Ahirwar Ankesh	<i>Haematococcus lacustris</i> cultivation in photosynthetic microalgae-assisted microbial fuel cell (PMA-MFC) for astaxanthin production
18:35	Casella Federico	FIELD TESTS ON RANDOM WAVE FORCES ACTING ON A HORIZONTAL CYLINDER COVERED BY BARNACLES
18:40	Chové Thomas	Massive MIMO Channel Model for Underwater Acoustic Communications
18:45	Dubois Antoine	Biofouling parameters analysis on Floating Offshore Wind Turbine mooring lines.
18:50	GIANNINI BEILLON Gabriel	Immobilization of microalgae in a microstructured hydrogel: application to the production of biohydrogen.
18:55	Gorczyńska Aneta	Holocene palaeogeographic changes of the Bay of Audierne (North-Western France). An interdisciplinary study.
19:00	Jiang Yuehan	Passive localization for Underwater Swarm Vehicles using a Low-cost Acoustic Modem
19:05	Kasse Mamadou	Détection d'intrusion dans un chemin de communications d'un réseau
19:10	Kervran Lena	The emotional impact of post-apocalyptic imaginaries of polluted seas
19:15	NKOUFUTH NFONGMO Yannick	Estimation of the introduction risk of non-indigenous species through ship ballast water in the Port of Douala (Cameroon)
19:20	Sirotiya Vandana	Effect of nanoparticles and amino acid supplementation on the fucoxanthin accumulation in the marine diatom <i>Phaeodactylum tricornutum</i>
